Work Experience

Data Engineer Intern

Jun 2024 – Aug 2024

Ninedot Energy

New York City, NY

- Automated and migrated rent payment calculations from Google Sheets to BigQuery leveraging dbt for data transformation.
- Web scraped 3,000+ documents for training of private LLM Chatbot assistant.
- Developed Google Cloud Functions to fetch and process API data and energy metrics from external APIs.
- Automated the deployment of Google Cloud Functions using Github Actions to ingest and process API data, integrating Fivetran for ETL pipeline synchronization of metadata and energy metrics.

Cloud Engineer

Aug 2021 – April 2023

NTT Data

Pune, India

- Implemented Job Scheduling framework using Python & Matillion workflows, resulting in 40% reduction in overall processing time.
- Developed CDC (Change Data Capture) framework in Snowflake and Matillion, leading to improved data quality and significant cost savings.
- Migrated legacy Microsoft SQL Server database with 10 TB+ of data to Snowflake, a cloud data warehouse, including all stored procedures, triggers, and ETLs, resulting in a 30% reduction in infrastructure costs.
- Optimized query performance by up to 30% and eliminated redundancy in the legacy data model, resulting in a 25% increase in report generation speed.

Software Developer Intern

Jan 2021 – July 2021

Symphony Fintech

Pune, India

- Contributed to the development of an iOS mobile trading application used by multiple clients.
- Integrated biometric authentication with Touch ID and Face ID, improving application security.
- Created a Proof of Concept to automate White-labeling in iOS apps using Xcode and Swift. Simplified Xcode build process for one-click generation of customized applications.

Education

MS in Computer Science

Sep 2023 – June 2025

Santa Clara University

Santa Clara, CA

BTech in Computer Science & Engineering

Aug 2017 – Aug 2021

NIIT University

Rajasthan, India

Technical Skills

Languages: Python, Go, SQL, Bash, Javascript, Swift, C++, C, HTML, CSS

Virtualization & Containerization: Docker, Kubernetes, QEMU

Frameworks & Libraries: Flask, OpenCV, Django, Numpy, Pandas, FastAPI, Apache Airflow, PySpark, Express, Node.js

Databases & Datawarehouses : MySQL, Snowflake, Microsoft SQL Server, SQLite, MongoDB, Azure SQL Database

Development Tools : VSCode, Unix/Linux, Git, Postman, Shell scripting

Projects

Scalable Data Server for Large Datasets | *Python, PySpark, MongoDB, Streamlit* | [\[Project Link\]](#)

- Designed and implemented a scalable data serving solution using Python, Apache Spark, MongoDB, and Streamlit, capable of efficiently handling over 2 million records while meeting the benchmark of serving 1 million records in under 3 minutes.

AI Based System Design Builder | *Python, NVIDIA AI Workbench, Javascript, D3.js, HTML, CSS* | [\[Project Link\]](#)

- Built AI-powered platform for generating and visualizing system architectures with NVIDIA AI Workbench.
- Created a user-friendly interface with manual design, AI assistance, voice input, and visual graphs; selected as one of the top 30 projects in HackAI - Dell and Nvidia Hackathon Challenge.

Google Landmark Recognition | *Python, Flask, Machine Learning, JavaScript* | [\[Project Link\]](#)

- Developed a Flask-based application using the DELG model for accurate landmark image recognition and retrieval.

Publication

Studying Multifaceted Collaboration of OSS developers and its impact on their bug fixing performance

Asia-Pacific Software Engineering Conference (W) | Data Mining, Software Engineering, Mining Software Repositories

- Developers fix bugs through discussions, creating Developer Social Networks (DSN). We extended DSN to Multi-layer DSN (MDSN), achieving a Pearson correlation coefficient of up to 0.74. This MDSN helps identify crucial developers in systems like Eclipse and Netbeans.
